Anne Grethe Pind has been painting her entire life, and has been a professional artist since 1999. She has run an art gallery out of her own house since 2004, first in Svendborg and now in Kgs. Lyngby, offering a very intimate art viewing and buying experience.

Anne Grethe Pind teaches Mindful Painting out of her home, where she has had clients from Denmark, Norway and Sweden. Anne Grethe Pind also lectures on the topics "The Art of Seeing", "Creativity—a Path to Innovation" and "The Courage to Change".

Art reviewer N.H. Klausen, mag. art. and art historian, in "Kunstavisen": "Anne Grethe Pind's paintings are inspired by nature, the unconscious, and in more recent years also of the faith and imagery of Christianity. Her earlier works were more abstract and expressionistic, whereas her later, religious-existential paintings have turned her imagery more concrete, and not just for the existential subjects, but also when it comes to her nature paintings."

Anne Grethe holds a Master's degree in Chemistry, and established the IT company in 1980. DSI developed the first fully integrated office suite with wordprocessing, database, reportgenerator and teles in Denmark and probably the world. The company was in 1988 named Denmark's best software company by Børsens Nyhedsmagasin and continues to thrive to this day under the name DSI-NEXT.
